

LDI Monitor - August 2022

Canadian Discount Curves as of 2022-08-31 *

Historical Interest Rates in Canada

Monthly LDI Highlights

During the month of August, long-term interest rates went up, driving liabilities down. Spreads increased by 4.6 bps on long-term provincial bonds (15 yr+) and decreased by 2.2 bps on long-term corporate bonds (15 yr+) over the month. Sample Canadian pension plan asset portfolios had negative returns (-2.26% to -2.2%) for the month. The sample accounting liability returns over the month ranged from -1.8% to -1.7%, while the solvency liability returns were between 0.3% and 5.3% depending on the plan's maturity.

Assumptions & Sources

(*) All discount curves shown are expressed as continuously compounded annual spot interest rates.

(**) Rates are based on the CIA methodology. The annuity purchase rate and the CIA prescribed spread are based on medium duration, liabilities as defined in the most recent CIA solvency valuation guidelines.

(***) The target duration of the accrued liabilities for the young, steady and mature pension plans are fixed to 17, 14 and 11 years respectively. Solvency, accounting and economic liabilities are assumed to discount expected nominal liability cash flows. All surplus return calculations assume a fully funded status at the beginning of the year. Asset allocation in equities is assumed to be evenly allocated amongst the S&P/TSX, S&P500 unhedged in CAD and MSCI-EAFE unhedged in CAD. Bank of America Merrill Lynch Canadian Broad Bond Market Index (CAN0) is used as the benchmark for fixed income. Sources: Fiera Capital, Bank of Canada, Bank of America Merrill Lynch, Bloomberg, MSCI-Barra, S&P and the Canadian Institute of Actuaries.
